## ViaCat 4100

---

### Viacat 4100

Chemical Name: Monobutyltin Oxide  
CAS No.: 2273-43-0

### Technical data

Appearance	White powder
Tin content	54.8 – 59.5%
Chlorine content	≤1.0%
Volatility	≤1.0%

### Application

Viacat 4100 is mainly used as catalyst in the production of U(S)PR and polyester polyols. It can also be a catalyst in the production of powder coating resins and polymeric plasticizers.

### Packaging

Available packaging: 25KG drum
